

Healing Process Prayer

At this time of New Moon, Solar Eclipse and Summer Solstice under the sign of Cancer 'the Great Mother', I am called to share this co-created prayer. Please feel free to recite this while gazing at the cards pulled or as you are guided. I begin:

I invoke the unconditional love of the Galactic Heart and give thanks for all that is good, true and nourishing of my Being on all levels through unconditional love. I surrender with forgiveness any issue to do with mothering or being mothered. I am worthy and deserving of nourishment straight from the sacred milk of unconditional love from beloved Galactic Mother.

I also allow divine grace and unconditional love to show me truth and creative solutions empowered by divine wisdom for all matters in my life. May all Beings know and be blessed and empowered by the Divine Mother to fulfill their purpose and potential.

May I empower and embrace my Sacred Masculine, as the sword of discernment, integrity, strength and honesty, the ability to protect and defend what is worthy from a position of inner spiritual connection to the wisdom of my divine feminine that is always revealing the way.

Through the spiritual authority residing in my heart as the Christ Lion of Judea, I cast out the darkness of negative influence for myself, my loved ones and my community, as well as current and future world events. May all leaders submit to wisdom for the greatest good of All.

Such is your love Great Spirit that our every human need is anticipated. May we open our hearts to such saving grace and truly embrace your ways, Great Spirit, bringing the harmony of Heaven to Earth through my own free will and divine grace. Through the power of the Great Spirit of Love it is done!

And so it is!
